

# Installation Instructions

## Parts included

Complete pre-assembled kit  
Mounting Bracket

## Required

Adjustable wrench  
Flush tank flexible hose with 7/8" nut & 3/8" nut

### Step 1

Turn off water supply by turning the flush tank shut-off valve.  
Flush to make sure flush tank is empty and water has stopped filling.

### Step 2

Unscrew the connector hose from the shut-off valve. Screw on Handy Spray connector on top of shut-off valve.  
If existing flush tank hose is stiff brass then also unscrew existing white flush tank nut and remove hose. Screw new flexible hose to underneath flush tank.

### Step 3

Screw on the compression nut at other end of flexible hose on top of Handy Spray connector and tighten.  
Turn on water and check for drips. Tighten as necessary.  
Holder can be screwed on to wall or hung on side of flush tank.
